Computer Application

REFLECTION

What I think about this squeaky clean people is that it is a good deal for people to take if they want to have their yard and stuff clean really I this this is for people with a big yard really for them. The people have great deals an people really need it I think for in the fall and summer because they need the plants to grow an the summer but the fall I think they really need it for water because it hardly rains in the fall its just really cold outside mostly. This really didn't help me with anything but I think is great for my typing and stuff I'm really starting to type faster in this class but if this thing was in real life i this would be good for people. Typing never crossed my mind but I like this class because I love getting on the computer to type an stuff and when I found out that I could use this for a job I thought hey well I can do this like as an nurse or something it is fun to type.
